

## Fruit Trees, page 1:

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early - Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Akane</b>	<b>Fruit Appearance:</b>	small - medium, red with white fles	juicy, tart, crisp, firm
<b>Zone:</b>	4	<b>Bearing:</b>	Bears fruit at a young age	
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Mid September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Long	drying, desert
<b>Other Notes:</b>	Fruit clings tightly to the tree			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early - Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Chestnut</b>	<b>Fruit Appearance:</b>	2" , edible crabapple	juicy, sweet, crisp, nutty
<b>Zone:</b>	3	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Rust resistant	<b>Storage Life:</b>	Medium	fresh eating
<b>Other Notes:</b>	Introduced by the University of Minnesota in 1946.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid - Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Connell Red</b>	<b>Fruit Appearance:</b>	large, brightly striped	juicy & sweet
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25' or 12-15' x 14'	<b>Harvest Time:</b>	Mid October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Long, until April/May	fresh eating & cooking
<b>Other Notes:</b>	'Connell Red' will not pollinate 'Fireside'. University of Minnesota- 1943.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid - Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Fireside</b>	<b>Fruit Appearance:</b>	large, red striped	juicy, sweet, mild, firm
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25' or 9-12' x 10'	<b>Harvest Time:</b>	Mid October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Rust resistant	<b>Storage Life:</b>	Long	fresh eating, cooking & desert
<b>Other Notes:</b>	'Fireside' will not pollinate 'Connell Red'. U of M- 1943.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid - Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Freedom</b>	<b>Fruit Appearance:</b>	large, red	juicy, slightly tart, crisp
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Late September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Great! spray-free tree	<b>Storage Life:</b>	Long, until January if kept cold	fresh eating, sauce & juice
<b>Other Notes:</b>	This tree is a good pollinator for 'Liberty'. 1985 New York introduction.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Haralred</b>	<b>Fruit Appearance:</b>	medium, deep red	juicy, tart, crisp, firm
<b>Zone:</b>	3	<b>Bearing:</b>		
<b>Height/Width:</b>	9-12' x 10'	<b>Harvest Time:</b>	Late September - Early October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	fire blight, russeting	<b>Storage Life:</b>	Long	best for cooking
<b>Other Notes:</b>	'Haralred' will not pollinate 'Haralson'. Bailey Nurseries' introduction			

## Fruit Trees, page 2:

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Late	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Haralson</b>	<b>Fruit Appearance:</b>	medium, red	juicy, slightly tart, crisp, firm
<b>Zone:</b>	3	<b>Bearing:</b>	Fruits 1st year, biennial thereafter	
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Early October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Long, often until March	fresh eating, cider, baking
<b>Other Notes:</b>	'Haralson' will not pollinate 'Haralred'. Introduced by the University of Minnesota- 19			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Hazen</b>	<b>Fruit Appearance:</b>	large, dark red; greenish yellow fles	juicy, sweet, mild, semi-firm
<b>Zone:</b>	3	<b>Bearing:</b>	Fruits 1st year, annual bearer after	
<b>Height/Width:</b>	10-15' x 14'	<b>Harvest Time:</b>	Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Great! spray-free tree	<b>Storage Life:</b>	Short	fresh eating, cooking & desert
<b>Other Notes:</b>	This tree has a natural, semi-dwarf form. 1980 North Dakota introduction.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Honeycrisp</b>	<b>Fruit Appearance:</b>	yellow fruit with red mottling	juicy, sweet/tart, crisp
<b>Zone:</b>	*3	<b>Bearing:</b>		
<b>Height/Width:</b>	9.5' x 9' or 9-12' x 10'	<b>Harvest Time:</b>	Late September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Very long	fresh eating, salad & sauce
<b>Other Notes:</b>	This University of Minnesota introduction is our best selling apple by far. (1991)			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid - Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Honeygold</b>	<b>Fruit Appearance:</b>	medium - large, blushed gold	juicy, sweet & crisp
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Early - mid October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Good apple scab resistance	<b>Storage Life:</b>	Medium	fresh eating & cooking
<b>Other Notes:</b>	'Honeygold' is the best yellow apple that is reliably hardy in Minnesota. U of M- 1969			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Liberty</b>	<b>Fruit Appearance:</b>	medium - large, bright red	juicy, bright & crisp
<b>Zone:</b>	4	<b>Bearing:</b>	annual producer	
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Late September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	Great! spray-free tree	<b>Storage Life:</b>	Long, usually until February	fresh eating, cooking, canning & desert
<b>Other Notes:</b>	1964 New York introduction.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Northern Lights</b>	<b>Fruit Appearance:</b>	large, bright red, striped	slightly tart, mild
<b>Zone:</b>	3	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Mid September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Short	fresh eating & cooking
<b>Other Notes:</b>	Use this tree for exposed location and northern zones. 1990 North Dakota introduction			

## Fruit Trees, page 3:

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Red Prairie Spy</b>	<b>Fruit Appearance:</b>	large, yellow with red overlay	juicy & crisp
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Late September - Early October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	rust and scab resistant	<b>Storage Life:</b>	Long, flavor improves with age	sauce, baking & freezing
<b>Other Notes:</b>	'Red Prairie Spy' will reward you with heavy yields. U of M- 1940.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Late Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Red Regent</b>	<b>Fruit Appearance:</b>	medium - large, red over yellow	juicy, sweet/tart, crisp
<b>Zone:</b>	4	<b>Bearing:</b>	bears fruit at a young age	
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Early October	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	cedar apple rust resistant	<b>Storage Life:</b>	Long	fresh eating & cooking
<b>Other Notes:</b>	Minnesotans just love this U of M apple! Introduced by the U of M- 1963.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>SnowSweet</b>	<b>Fruit Appearance:</b>		sweet, slightly tart, unusual
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Mid - Late September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	fire blight and scab resistant	<b>Storage Life:</b>		fresh eating & salad, slow to oxidize
<b>Other Notes:</b>	'Honeycrisp' makes a great pollinator for this, fellow U of M tree.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>State Fair</b>	<b>Fruit Appearance:</b>	medium, red striped	juicy, sweet & firm
<b>Zone:</b>	3	<b>Bearing:</b>		
<b>Height/Width:</b>	20-25' x 25'	<b>Harvest Time:</b>	Mid - Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Short	fresh eating, salad & baking
<b>Other Notes:</b>	'Honeycrisp' makes a great pollinator for this tree. U of M introduction- 1978.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Sweet Sixteen</b>	<b>Fruit Appearance:</b>	medium, red striped	juicy, very sweet, crisp
<b>Zone:</b>	*3	<b>Bearing:</b>	may be slow to produce, then annu	
<b>Height/Width:</b>	12-15' x 14'	<b>Harvest Time:</b>	Mid - Late September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	fire blight and scab resistant	<b>Storage Life:</b>	Long	sauce, baking & desert
<b>Other Notes:</b>	Introduced by the University of Minnesota in 1978.			

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early - Mid Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Wealthy</b>	<b>Fruit Appearance:</b>	red striped to red	very juicy, tart, balanced
<b>Zone:</b>	3	<b>Bearing:</b>	biennial producer	
<b>Height/Width:</b>	20-25' x 25' or 12-15' x 14'	<b>Harvest Time:</b>	Mid September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	fire blight, apple scab, rust	<b>Storage Life:</b>	Medium	fresh eating & cooking, good multi-purpose
<b>Other Notes:</b>	'Wealthy' makes an excellent pollinator. It is the first MN apple to be used commerci			

## Fruit Trees, page 4:

<b>Fruit Type:</b>	Apple 	<b>Pollination Time:</b>	Early Season	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Zestar</b>	<b>Fruit Appearance:</b>		juicy, sweet/tart, crisp
<b>Zone:</b>	*3	<b>Bearing:</b>		
<b>Height/Width:</b>	9-12' x 10'	<b>Harvest Time:</b>	Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Medium	fresh eating & cooking
<b>Other Notes:</b>	This is a delicious apple! 'Zestar' is another, wonderful, U of M introduction.			

<b>Fruit Type:</b>	Apricot 	<b>Pollination Time:</b>	Self-fruitful, better with pollinator	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Pioneer Chinese</b>	<b>Fruit Appearance:</b>	clingstone, yellow with red blush	juicy, sweet, firm
<b>Zone:</b>	4	<b>Bearing:</b>	bears heavily at a young age	
<b>Height/Width:</b>	10-15' tall	<b>Harvest Time:</b>	Mid July	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating, edible pit
<b>Other Notes:</b>	Choose this tree if you want to grow apricots and have limited space.			

<b>Fruit Type:</b>	Cherry 	<b>Pollination Time:</b>	Self-fruitful	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Meteor</b>	<b>Fruit Appearance:</b>	freestone, large, red w/ yellow flesh	mildly acidic
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	10-14' tall	<b>Harvest Time:</b>	Early July	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		sauce, preserves & pie
<b>Other Notes:</b>	'Meteor' is a natural, genetic dwarf. University of Minnesota introduction- 1952.			

<b>Fruit Type:</b>	Cherry 	<b>Pollination Time:</b>	Self-fruitful	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>North Star</b>	<b>Fruit Appearance:</b>	freestone w/ small pit, large, red	mildly acidic, pleasant
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	8-10' tall	<b>Harvest Time:</b>	Late June	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating, canning & pie
<b>Other Notes:</b>	'North Star' is a natural, genetic dwarf. U of M- 1950.			

<b>Fruit Type:</b>	Peach 	<b>Pollination Time:</b>	Self-fruitful	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Contender</b>	<b>Fruit Appearance:</b>	freestone with bright yellow flesh	very juicy, sweet
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	12-15' tall	<b>Harvest Time:</b>	Mid - late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating, canning, baking & freezing
<b>Other Notes:</b>	The hardiness of this peach is currently being evaluated here at the farm.			

<b>Fruit Type:</b>	Pear 	<b>Pollination Time:</b>	Early May	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Patten</b>	<b>Fruit Appearance:</b>	large, yellow	juicy & tender
<b>Zone:</b>	4	<b>Bearing:</b>		
<b>Height/Width:</b>	15' tall	<b>Harvest Time:</b>	Mid September	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>	Pick 1 week before ripe	fresh eating & canning
<b>Other Notes:</b>	Ripen pears in a cool place.			

## Fruit Trees, page 5:

<b>Fruit Type:</b>	Pear 	<b>Pollination Time:</b>	Early May	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Summcrisp</b>	<b>Fruit Appearance:</b>	medium, green with a red blush	sweet & crisp
<b>Zone:</b>	4	<b>Bearing:</b>	annual producer	
<b>Height/Width:</b>	15' tall	<b>Harvest Time:</b>	Mid August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>	good fire blight resistance	<b>Storage Life:</b>	up to 2 months	fresh eating
<b>Other Notes:</b>	'Parker' or 'Patten' are the best pollinators for this tree. U of M- 1985.			

<b>Fruit Type:</b>	Plum 	<b>Pollination Time:</b>	Late April	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Black Ice</b>	<b>Fruit Appearance:</b>	large, blue-black, cherry plum cross	juicy & very sweet
<b>Zone:</b>	*3	<b>Bearing:</b>		
<b>Height/Width:</b>	8-12' tall	<b>Harvest Time:</b>	Early August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		
<b>Other Notes:</b>	This plum has a natural, dwarf form. 'Toka' makes a good pollinator.			

<b>Fruit Type:</b>	Plum 	<b>Pollination Time:</b>	Late April	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Pipestone</b>	<b>Fruit Appearance:</b>	clingstone, huge red w/ yellow fles	juicy & sweet, high quality
<b>Zone:</b>	3	<b>Bearing:</b>		
<b>Height/Width:</b>	10-15' tall	<b>Harvest Time:</b>	Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating & preserves
<b>Other Notes:</b>	University of Minnesota introduction- 1942.			

<b>Fruit Type:</b>	Plum 	<b>Pollination Time:</b>	Late April	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Superior</b>	<b>Fruit Appearance:</b>	clingstone, large, dark red	sweet & juicy
<b>Zone:</b>	4	<b>Bearing:</b>	heavy producer, often the first year	
<b>Height/Width:</b>	10-15' tall	<b>Harvest Time:</b>	Late August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating & preserves
<b>Other Notes:</b>	'Toka' makes a good pollinator for this tree.			

<b>Fruit Type:</b>	Plum 	<b>Pollination Time:</b>	Late April	<b>Fruit Flavor:</b>
<b>Variety:</b>	<b>Toka</b>	<b>Fruit Appearance:</b>	clingstone, medium - large, bronze	rich & spicy, firm
<b>Zone:</b>	3	<b>Bearing:</b>	heavy producer	
<b>Height/Width:</b>	15-20' tall	<b>Harvest Time:</b>	Mid August	<b>Fruit Uses:</b>
<b>Disease Resistance:</b>		<b>Storage Life:</b>		fresh eating & canning
<b>Other Notes:</b>	Everyone agrees that this is a superior pollinator. South Dakota Experiment Station- 1
